Subject: RE: NCATE documentation needed

Dr. Lindahl,

Do you want the list of workshops for Blackboard also?

According to my record the following Technology workshops were conducted for faculty:

February 1, 2005 Emerging Technologies
 February 8, 2005 Assistive Technology
 March 8, 2005 Assistive Tech Tools
 April 13, 2005 Handhelds in the Classroom

Roger had all of the documentation -signin sheets-consultant contact information- etc. etc. etc. I do not know the impact on the p-12 technology facilities. I think the workshops made the ASU faculty more aware of the technologies which would have a direct impact on the candidates they teach. There were no evaluation sheets that we kept. The consultant had an online evaluation, I do not know the results. That consultant has left the position and the State. I do not have her contact information. In the future, I will make sure the technology workshops have an evaluation with a followup to review the impact on K 12.

Agnes,

Are you and your NCATE sub-committee having as much fun as I am with NCATE documentation? For Standard VI, we need a list of technology workshops given in 2005-2006, the results of the technology use survey, and documentation on our use of P-12 technology facilities (e.g., for workshops to p-12 personnel, etc.). As these are all technology items, I am in hopes that you have this documentation.

Thanks,

Ron
